Dear Chris,

Thank you, again, for your assistance on our Bourne project. I must say that your help in hiring the right consultant, and your research toward our reclamation project was impressive. It proved to be invaluable in creating the final design and ultimately acquiring the approval of the final proposal. It is clear that your experience in these areas has served you well, and we are happy to be the beneficiaries of such knowledge.

When you are in the area please stop by the project and see the results of the initial hydro-seeding. Your crew did a great job, as they have always done for us in the past, despite the tough terrain. I am excited to see how this will look after some more work in the spring.

Once again you have delivered as promised, on budget, on time, and on point with the desired result, and your willingness to be flexible and accommodate our sometimes unpredictable schedule changes has also been appreciated.

Please know that I would be happy to speak with prospective clients regarding your professional approach and the results you've delivered for Cape Cod Aggregates. It is a pleasure to work with a company that values customer service as much as we do. I look forward to working with you over the next few years to complete our project. Thank you again for the help, and please be prepared, we have a lot more to do!

Sincerely,

David V. Peterson, Jr.
